

# ENVIRONMENTAL POLICY

JOYSONQUIN Automotive Systems Polska Sp. z o.o. as a manufacturer of high-quality interior components for premium cars, has made a commitment to care for the environment and to promote the rules of sustainable development. In accordance with the values adopted by the organization, we care about the environment not only by respecting applicable law **and others**, but also by setting appropriate environmental goals. In order to achieve these goals, we do not limit taken actions to the removal of waste, leftovers of wood and chemicals, but we also commit ourselves to:

- deliberate and careful processing of raw materials;
- disseminate environmental awareness among employees;
- apply good methods to prevent pollution by managing significant environmental aspects;
- economical using of environmental resources;
- **responsible chemistry management;**
- **measures to increase energy efficiency, including the use of renewable energy sources and reduction of greenhouse gas emissions;**
- implementation of structured reduction of the company's negative environmental impact.

The assumptions listed above are being implemented by using the worked out solution – the system approach to environmental management, based on the requirements of the ISO 14001 standard. By providing the necessary resources to implement present policy, the JOYSONQUIN Management Board undertakes to disseminate and implement it, and to constantly improve the environmental management system to make environmental performance better and more efficient.
